

# B/S<sup>®</sup> SPANGE Classic

## B/S BRACE SYSTEM

The „classic“ for problem-free use

The B/S Brace is a thin, easy-to-use plastic adhesive bar for cosmetic treatment of sensitive toenails. It is glued over the entire nail surface, optimally distributing the necessary spring forces to provide relief for the affected tissue. Both the optimal fit and firm adhesion allow the patient a high level of wearing comfort.

1. Thorough preparation

2. Careful degreasing

3. Exact fitting from the start

4. Exact fitting to the end

5. Grinding the ends of the brace

6. Application of the B/S activator

7. Application of the B/S Basic adhesive

8. Correct centre fixing

9. Pressing the B/S Brace into place on the right

10. Pressing the B/S Brace into place on the left

11. Aligning the brace transitions

12. Individual tension correction

13. Careful final cleaning

14. Final sealing

15. Satisfying results
